

Renovo Soft Top Canvas Cleaner

Application Instructions

Please note: It is advisable to test on an inconspicuous area first to ensure the fabric is colourfast dyed.

1. Dry brush the soft-top to remove any residual dirt.
2. Shake bottle well prior to removing top
3. Pour into suitable container
4. Apply with a clean 2" paintbrush using even brush strokes. Start at the centre of the cover working out towards the edge.
5. Remove with a damp sponge or cloth.
6. Subject to drying conditions allow approximately 1 hour for the top to dry before applying any further Renovo products.

For heavily soiled convertible tops leave the solution to dry for approximately 30 minutes - the optimum time for active ingredients to work. Heavily soiled surfaces should be scrubbed with a bristle brush prior to application.
