

# MGF and MGTF Hardtop

**Availability  
6 - 8 weeks**

A classically styled Heritage hardtop is the ultimate accessory. Evoking images from the great days of MG's racing and rallying heritage, its elegant design blends tradition with modern refinement. Sleek and secure, the Heritage hardtop transforms one of the world's most exciting and loved small sports cars into a stylish and comfortable tourer.

Crafted and designed with the approval of the vehicle's designer, Gerry McGovern, and uniquely incorporating the bonnet and boot lid feature lines with an MG octagon on the "B" post extension, the Heritage hardtop accentuates the purposeful looks of MG's modern classic. The hardtop is available in black gel coat or in matching body colours, including the three very latest MGTF 85 colours (see below). The interior can be finished with a leather headlining, specified in a colour to match the standard vehicle trim colour. A heated glass rear window is standard.

Installation and removal are simple operations as the hardtop is fixed to the standard factory fitted latch points. Within moments, your new hardtop can provide the luxury of quiet comfort, added security and protection against the elements.

Hardtop fitment and use during the inclement winter months has for years been the natural choice for those wishing to extend and preserve the life of their car's soft top and adding saloon car comfort.
